

# Celebrating World Environment Day

5<sup>th</sup> June, 2022

Chandrapur College

Purba Bardhaman

At present we are going into the phase of Anthropocene, i.e., the era of human domination on the earth. All over the world, the physical environment, atmosphere and natural habitat are degraded to a large extent through technological modification of earth's components and exploitation of resources. The human activities promote global warming and climate change. So, World Environment Day (WED) is celebrated annually on 5 June and is the United Nations' principal vehicle for encouraging awareness and action for the protection of the environment. This year, 2022, Sweden hosts the WED having a theme of '*Only One Earth*' which focuses on living sustainably in harmony with nature.

Following the oath of WED, the students and teachers of the College were engaged to organize a program related to environmental consciousness and tree plantation at the nearest village, Boinchi on that day. All total 23 students were involved in the awareness program in the village. They distributed more than 100 tree saplings to the villagers. Alongside, teaching and non-teaching staffs also planted tree sapling in the college premises. The following photographs are the glimpses of the event.
